The revenue from energy saving lamps accounts for over 60% of the company's main business revenue, including revenue from integrated electronic lamps, single-capped fluorescent lamps and lighting tubes. The company currently owns 13 energy saving lamp production lines, with annual output of 80 million and qualification rate of 93%-96%.

HID (high intensity discharge) lamps include mercury lamps, Metal Halide Lamps, high/low voltage sodium lamps, etc. The company currently owns four automotive HID lamps production lines, of which, the annual capacity of three lines each is 1.2 million, and that of the other line is 400,000. The total capacity is 4 million.

In 2008, the company developed Ceramic Metal Halide Lamps, which are mainly applied in commercial lighting, public places and leisure places and can replace metal halide lamps and high-voltage sodium lamps. Currently, the company's ceramic metal halide lamps have the power of 35-70 watts.

The company's annual output of UV lamps is 4 million. The profitability of the UV lamps has kept strong since 2003. And the revenue from UV lamps is rising year by year; its gross profit margin has maintained 40% above in recent years. The UV lamps are mainly applied in small household appliances, sewage treatment and hospital, etc.
