

## *China Organic Silicon Industry Report, 2008-2009*

Since the industrialized production of organic silicon by Dow Corning, thanks to its unique features and outstanding performance, Organic silicon has been utilized in architecture, electronics, automotive and healthcare products.

Due to low technology threshold, there are a great number of silicon briquette producers in organic silicon industrial chain, but with small market share and low bargaining ability. Since high entry barriers to intermediates sector, there are just five to ten producers; while the downstream industry grows rapidly with a variety of products and scattered clients. For instance, revenue and profit from any downstream product and client of the world largest organic silicon producer Dow Corning was less than 3% of its total.

## Number of Organic Silicon Companies
