

Asia Telecom Industry Report, 2008-2009

Asia's telecom market is with huge potential and rapid development, while its mobile phone prevalence ratio in Asia is far lower than Europe and America, leaving vast room for the new technologies to grow like 3G. In addition, the consumers in China calls more for high-rate broadband than Europe and America, but the broadband prevalence ratio is low as well. Now, the broadband construction is under the way, and both cable broadband and wireless broadband are popular among the users.
