

China Drinking Water Market Report, 2008-2009 (Updated Version)

With the improvement of living standard, the output and sales of drinking water have increased sharply in China and the market will maintain a growth at 15% in the next 5-10 years.

The drinking water can be divided into two categories: bottled water and barreled water. Bottled water shared 40% of total soft drink output in China, and it is the key study object of this report. Bottled water normally sold cross-regionally; relies to the advertising and quality; while barreled water normally sold locally, relies to the service but also the quality.

Since the year of 2000, the output of bottled water has maintained NO.1 in China's soft drink market. Its output up 13.67% and 16.46% in 2006 and 2007 respectively. Moreover, during Jan to Jul 2008, the bottled water output achieved a growth at 30%, which was mainly contributed by the share output growth from the provinces of Guangdong, Jilin and Henan.
