

**China Aquaculture Industry Report,  
2015-2018**

**Oct. 2015**

## STUDY GOAL AND OBJECTIVES

This report provides the industry executives with strategically significant competitor information, analysis, insight and projection on the competitive pattern and key companies in the industry, crucial to the development and implementation of effective business, marketing and R&D programs.

## REPORT OBJECTIVES

- ◆ To establish a comprehensive, factual, annually updated and cost-effective information base on market size, competition patterns, market segments, goals and strategies of the leading players in the market, reviews and forecasts.
- ◆ To assist potential market entrants in evaluating prospective acquisition and joint venture candidates.
- ◆ To complement the organizations' internal competitor information gathering efforts with strategic analysis, data interpretation and insight.
- ◆ To suggest for concerned investors in line with the current development of this industry as well as the development tendency.
- ◆ To help company to succeed in a competitive market, and

## METHODOLOGY

Both primary and secondary research methodologies were used in preparing this study. Initially, a comprehensive and exhaustive search of the literature on this industry was conducted. These sources included related books and journals, trade literature, marketing literature, other product/promotional literature, annual reports, security analyst reports, and other publications. Subsequently, telephone interviews or email correspondence was conducted with marketing executives etc. Other sources included related magazines, academics, and consulting companies.

## INFORMATION SOURCES

The primary information sources include Company Reports, and National Bureau of Statistics of China etc.

## Abstract

With the improvement of cultivation technology and the steady growth in per-capita consumption of aquatic products, both the output value of Chinese fishery industry and the output of aquatic products keep growing year after year. In 2014, the gross output value of China's fishing industry amounted to RMB2.0859 trillion, and the added value was up to RMB971.8 billion; the national output of aquatic products totaled 64.615 million tons, a rise of 4.7% from a year earlier, of which the output of aquaculture reported 47.484 million tons, up 4.6% year on year.

Freshwater culture is the main part of aquaculture in China, with its output holding more than 60%. In 2014, the freshwater cultured output reached 29,357.6 kt, accounting for 61.8%; and mariculture output hit 18,126.5 kt, occupying 38.2%. In freshwater aquaculture, fishes are the primary varieties, making up about 88% of total output of freshwater culture; while in mariculture, the shellfishes see the highest output, an above-70% share of total output of seaculture.

The regions like Guangdong, Shandong, Fujian, Jiangsu and Hubei are the key aquaculture provinces in China, with their total output sweeping over 50% of national output. Elaborately, Guangdong is the largest province in terms of aquaculture, with equal output of freshwater culture to that of mariculture; Fujian and Shandong give priority to seaculture; while Jiangsu and Hubei are mainly involved in freshwater breeding.

Chinese aquaculture industry is composed of individual farmers, cooperatives and enterprises, among which aquaculture enterprises are in the advantageous position in competition, but with inadequate power of exerting influence on the market.

Chinese aquaculture companies consist mainly of ZONECO Group, Zhanjiang Guolian Aquatic Products Co., Ltd, Dalian Yi Qiao Sea Cucumber Co., Ltd, Shandong Oriental Ocean Sci-Tech Co., Ltd., Shandong Homey Aquatic Development Co., Ltd., Pure Pearl Group Co., Ltd and Dahu Aquaculture Company Limited. In 2014, the total aquaculture output of ZONECO Group, Zhanjiang Guolian Aquatic Products Co., Ltd and Dalian Yi Qiao Sea Cucumber Co., Ltd was merely 82.65 kt, just making up 0.174%.

**Zhanjiang Guolian Aquatic Products Co., Ltd** is China's state-level penaeusvannamei genetics & breeding center, with the revenue from aquaculture business in 2014 reaching RMB1.988 billion with a share of 0.23% in Chinese aquaculture market. The company is now endeavoring to transfer to be a global aquatic marketing platform and aquatic food maker; also, it strengthens the domestic market construction and brand promotion.

**ZONECO Group** is primarily focused on seaculture business, boasting the largest clear seawaters in China. In 2014, the aquaculture output of the company was up to 53.43 kt, sharing 0.113% of national total output in the same period. In August 2015, the company publicized the preplan of non-public offering of shares and planned to raise RMB1.45 billion for fingerling platform construction project, O2O new business model construction project and otherwise, in a bid to accelerate its transition towards a food enterprise.

**Dahu Aquaculture Company Limited** is the largest freshwater fish base and in possession of about 1.8 million mu (1mu=1/15 hec.) of water area in China, making up 4.9% of the area of reservoirs and lakes with aquaculture across the country. It has been focusing on the construction of its marketing network and comprehensive industrial chain by means of acquisitions and capital increase over the recent two years.

China Aquaculture Industry Report, 2015-2018 highlights the following:

- Development environment of China aquaculture industry report, involving industrial policy, residents' consumption, the development of upstream and downstream sectors, etc.;
- Development overview of China aquaculture industry, including status quo, mariculture, freshwater aquaculture, aquatic fingerlings, import & export, competitive landscape, prediction and outlook, etc.;
- Development overview of key aquaculture regions (like Guangdong, Shandong, Fujian, Jiangsu and Hubei) in China, and the development of medium- and high-end aquatic products (such as abalone, sea cucumber, prawn, tilapia);
- Operation, developments and so forth of 15 Chinese aquaculture companies.

### **About ResearchInChina**

ResearchInChina ([www.researchinchina.com](http://www.researchinchina.com)) is a leading independent provider of China business intelligence. Our research is designed to meet the diverse planning and information needs of businesses, institutions, and professional investors worldwide. Our services are used in a variety of ways, including strategic planning, product and sales forecasting, risk and sensitivity management, and as investment research.

### **Our Major Activities**

- *Multi-users market reports*
- *Database-RICDB*
- *Custom Research*
- *Company Search*

**RICDB** (<http://www.researchinchina.com/data/database.html>), is a visible financial data base presented by map and graph covering global and China macroeconomic data, industry data, and company data. It has included nearly 500,000 indices (based on time series), and is continuing to update and increase. The most significant feature of this base is that the vast majority of indices (about 400,000) can be displayed in map.

After purchase of our report, you will be automatically granted to enjoy 2 weeks trial service of RICDB for free.

After trial, you can decide to become our formal member or not. We will try our best to meet your demand. For more information, please find at [www.researchinchina.com](http://www.researchinchina.com)
