Global and China Dissolving Pulp Industry Report, 2018-2022

September 2018
STUDY GOAL AND OBJECTIVES
This report provides the industry executives with strategically significant competitor information, analysis, insight and projection on the competitive pattern and key companies in the industry, crucial to the development and implementation of effective business, marketing and R&D programs.

REPORT OBJECTIVES
◆ To establish a comprehensive, factual, annually updated and cost-effective information base on market size, competition patterns, market segments, goals and strategies of the leading players in the market, reviews and forecasts.
◆ To assist potential market entrants in evaluating prospective acquisition and joint venture candidates.
◆ To complement the organizations’ internal competitor information gathering efforts with strategic analysis, data interpretation and insight.
◆ To suggest for concerned investors in line with the current development of this industry as well as the development tendency.
◆ To help company to succeed in a competitive market, and

METHODOLOGY
Both primary and secondary research methodologies were used in preparing this study. Initially, a comprehensive and exhaustive search of the literature on this industry was conducted. These sources included related books and journals, trade literature, marketing literature, other product/promotional literature, annual reports, security analyst reports, and other publications. Subsequently, telephone interviews or email correspondence was conducted with marketing executives etc. Other sources included related magazines, academics, and consulting companies.

INFORMATION SOURCES
The primary information sources include Company Reports, and National Bureau of Statistics of China etc.
**Abstract**

With the commissioning of new dissolving pulp projects, the global dissolving pulp capacity had been up to about 8,000 kt by the end of 2017. It is worth noticing that the top six producers including Sappi, Aditya Birla, Lenzing, Sun Paper, Bracell and Rayonier boast the combined capacity of approximately 4,443.25 kt as a percentage of 55.5% in global total.

So far, foreign giants like Sappi, Birla and Lenzing, as well as Chinese peers such as Sun Paper, Asia Symbol and Chenming Paper, have been ramping up production of dissolving pulp aggressively, from which it can be seen that the world’s production of dissolving pulp is on the rise and will lead to overcapacity in future, and that small and medium-sized manufacturers will be forced to retreat from the market, contributing to higher concentration of the dissolving pulp industry.

As a major global consumer of dissolving pulp, the apparent consumption of dissolving pulp in China has risen steadily in recent years, and reached 4,420 kt in 2017, up 4.2% year-on-year. However, China's dissolving pulp capacity utilization rate is not high, with the actual output of 1,800 kt and the import dependence rate of 59.3%.

There are now about a dozen Chinese dissolving pulp manufacturers, among which Sun Paper, Hunan Juntai and Asia Symbol possess higher productivity reaching 500kt, 300kt and 200kt respectively, together occupying 56.7% of the total capacity.

In 2013, China initiated anti-dumping investigation against imported dissolving pulp products, because the imports flooded at low prices and took a lion’s share in the Chinese dissolving pulp market and caused serious excess of dissolving pulp capacity in China. Moreover, Chinese government also decided in August 2018 to impose 5% tariff on dissolving pulp originating in the United States. These measures favor the development of local enterprises, and it is expected that China's dissolving pulp production will rise steadily in the next few years, and its import dependence will go down.

Global and China Dissolving Pulp Industry Report, 2018-2022 by ResearchInChina focuses on the followings:

- Global dissolving pulp industry (development status, competitive landscape, prices, etc.);
- China’s dissolving pulp industry (development status, anti-dumping investigation, supply/demand competitive landscape, imports, etc.);
- Downstream viscose fiber industry (status quo, capacity, output, imports/exports, prices, etc.);
- 5 global and 8 Chinese dissolving pulp producers (operation, R&D investment, dissolving pulp business, etc.);
- Conclusion and forecast.

About ResearchInChina

ResearchInChina (www.researchinchina.com) is a leading independent provider of China business intelligence. Our research is designed to meet the diverse planning and information needs of businesses, institutions, and professional investors worldwide. Our services are used in a variety of ways, including strategic planning, product and sales forecasting, risk and sensitivity management, and as investment research.

Our Major Activities

- Multi-users market reports
- Database-RICDB
- Custom Research
- Company Search

RICDB (http://www.researchinchina.com/data/database.html), is a visible financial data base presented by map and graph covering global and China macroeconomic data, industry data, and company data. It has included nearly 500,000 indices (based on time series), and is continuing to update and increase. The most significant feature of this base is that the vast majority of indices (about 400,000) can be displayed in map.

After purchase of our report, you will be automatically granted to enjoy 2 weeks trial service of RICDB for free.

After trial, you can decide to become our formal member or not. We will try our best to meet your demand. For more information, please find at www.researchinchina.com
