

**Global and China Needle Coke Industry  
Report, 2019-2025**

**May 2019**

## **STUDY GOAL AND OBJECTIVES**

This report provides the industry executives with strategically significant competitor information, analysis, insight and projection on the competitive pattern and key companies in the industry, crucial to the development and implementation of effective business, marketing and R&D programs.

## **REPORT OBJECTIVES**

- ◆ To establish a comprehensive, factual, annually updated and cost-effective information base on market size, competition patterns, market segments, goals and strategies of the leading players in the market, reviews and forecasts.
- ◆ To assist potential market entrants in evaluating prospective acquisition and joint venture candidates.
- ◆ To complement the organizations' internal competitor information gathering efforts with strategic analysis, data interpretation and insight.
- ◆ To suggest for concerned investors in line with the current development of this industry as well as the development tendency.
- ◆ To help company to succeed in a competitive market, and

## **METHODOLOGY**

Both primary and secondary research methodologies were used in preparing this study. Initially, a comprehensive and exhaustive search of the literature on this industry was conducted. These sources included related books and journals, trade literature, marketing literature, other product/promotional literature, annual reports, security analyst reports, and other publications. Subsequently, telephone interviews or email correspondence was conducted with marketing executives etc. Other sources included related magazines, academics, and consulting companies.

## **INFORMATION SOURCES**

The primary information sources include Company Reports, and National Bureau of Statistics of China etc.

## Abstract

Needle coke with merits of good orientation and excellent conductivity and thermal conductivity, is mainly used in graphite electrodes for electric steelmaking and lithium battery anode materials.

Against the backdrop of environmental regulation and supply-side reform in China, electric steelmaking demand has soared since 2017, boosting the demand for needle coke for ultrahigh & high power graphite electrodes; also, the demand for lithium battery artificial graphite anode material keeps rising, all of which led to short supply of needle coke in the Chinese market. In particular, China's dependence on imported quality needle coke has widened the gap. In 2018, China imported 220 kilotons of needle coke mainly from Japan, South Korea, UK and the United States, 29.4% more than in the previous year, among which 40% was for graphite electrodes and 60% for anode materials.

The supply and demand gap and strong demand from downstream markets have pushed up needle coke prices in China since 2017. By the end of 2018, raw needle coke prices ranged at RMB14,000-16,000/ton and burnt needle coke at RMB25,000-30,000/ton; imported needle coke for graphite electrode was priced at USD3,200-4,000/ton and that for anode material at USD1,200-2,000/ton. In the first half of 2019, prices of imported Phillips 66 needle cokes hiked, of which those for graphite electrodes and anode materials surged by 23.53% and 16.67%, respectively.

In China, typical petroleum-based needle coke companies include Jinzhou Petrochemical, Shandong Yida New Material and Shandong Jingyang Technology; main coal-based needle coke players are Shanxi Hongte Coal Chemical, Anshan Open Carbon Thermal New Materials, Baowu Carbon, Qitaihe Baotailong Coal&Coal Chemicals Public and Fangda Xikemo (Jiangsu) Needle Coke Technology. A great number of companies at home and abroad have been allured by huge profits into the industry since 2017, as they do in 2019 when a few projects will be put into production, including Ansteel's 40kt/a needle coke project, Pingdingshan Xuyang Xingyu New Materials Co., Ltd.'s 50kt/a needle coke project and Henan Kaitan New Materials Co., Ltd.'s 40kt/a needle coke project. China will boast a new needle coke capacity of about 450kt/a in late 2019 and 300kt/a in 2020.

### Needle Coke Capacity of Main Companies in China, 2018

Company	Product	Capacity (kt/a)
Jinzhou Petrochemical	Petroleum-based needle coke	50
Shandong Yida New Material	Petroleum-based needle coke	70
Shandong Jingyang Technology	Petroleum-based needle coke	70
Shanxi Hongte Coal Chemical	Coal-based needle coke	100
Anshan Open Carbon Thermal New Materials	Coal-based needle coke	40
Baowu Carbon	Coal-based needle coke	50
Qitaihe Baotailong Coal & Coal Chemicals Public	Coal-based needle coke	50
Fangda Xikemo (Jiangsu) Needle Coke Technology	Coal-based needle coke	60

The report highlights the following:

- Global needle coke market (supply, demand and competition);
- China needle coke market (development environment (including policy, technology and trade), supply and demand, competitive pattern, price trend and key projects);
- China graphite electrode market (supply and demand, competitive pattern, price trend and needle coke demand);
- China lithium battery anode material market (supply and demand, competitive pattern, price trend and needle coke demand);
- 7 global and 15 Chinese needle coke companies (operation, needle coke business, etc.).

### **1. Needle Coke**

- 1.1 Product Introduction
- 1.2 Classification and Application
- 1.3 Industry Chain

### **2. Global Needle Coke Industry**

- 2.1 Overview
- 2.2 Supply & Demand
  - 2.2.1 Supply
  - 2.2.2 Demand
- 2.3 Technical Status
- 2.4 Market Pattern
  - 2.4.1 USA
  - 2.4.2 Japan

**RICDB** (<http://www.researchinchina.com/data/database.html>), is a visible financial data base presented by map and graph covering global and China macroeconomic data, industry data, and company data. It has included nearly 500,000 indices (based on time series), and is continuing to update and increase. The most significant feature of this base is that the vast majority of indices (about 400,000) can be displayed in map.

After purchase of our report, you will be automatically granted to enjoy 2 weeks trial service of RICDB for free.

After trial, you can decide to become our formal member or not. We will try our best to meet your demand. For more information, please find at [www.researchinchina.com](http://www.researchinchina.com)
