Global and China Passenger Car T-Box Market Report, 2021

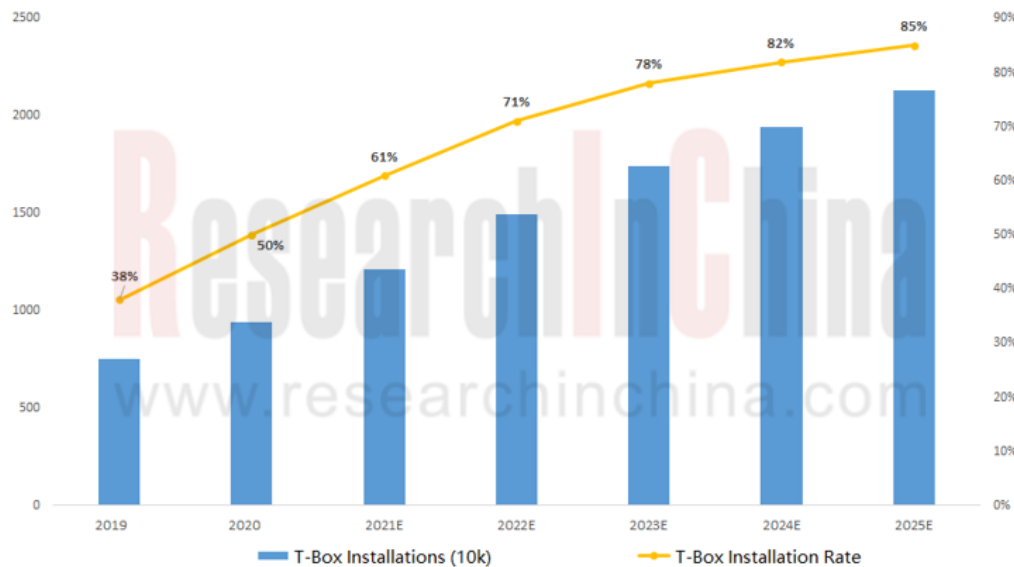

May 2021

In 2020, passenger car T-Box increased by 25.4% year-on-year, and the proportion of 5G T-Box jumped

ResearchInChina released Global and China Passenger Car T-Box Market Report 2021, analyzing and predicting T-Box technology and market trends, as well as conducting research on mainstream T-Box vendors at home and abroad.

In 2020, 9.404 million passenger cars (50.0% of the total) were installed with T-Box by OEMs in China, a year-on-year increase of 25.4%. By 2025, the OEM T-Box installation rate of passenger cars in China will reach 85%, and over 20 million passenger cars will be installed with T-Box.

T-Box Installations of Passenger Cars in China, 2019-2025

Source: ResearchInChina

China's passenger car T-Box market is highly concentrated. Top 5 companies enjoy 45.6% market share and Top 10 companies 70.7%. The top vendors include LG Electronics, Valeo, Denso, LANYOU Technology, Continental, ECARX, Jingwei Hirain Technologies, etc. The first-ranked LG Electronics sees T-Box in 1.16 million vehicles, mainly serving GM, Lynk & Co, Kia, Hyundai, Geely, FAW Hongqi, etc.; its T-Box factory is located in Kunshan of Jiangsu.

DFS Industrial Group owns 80% stake in LANYOU Technology whose networked equipment model is TCU GEN2-A 4G. More than 90% of its T-Box products are available in Dongfeng's models, such as Dongfeng Motor, Dongfeng Renault, Dongfeng Venucia, Dongfeng Nissan, etc.

Jingwei Hirain Technologies installed TBOX-Ext 4100 in 369,000 vehicles of FAW, JMC, GAC NE, Ford, Shanghai GM, etc. in 2020.

With the popularization and development of Telematics, T-Box is developing towards hardware integration and diversified functions. T-Box will not only collect, clean, sort, store, process and forward data, but also closely coordinate calculations with related functional components to reduce redundancy, improve efficiency, and enhance safety so as to achieve the effect of 1+1>2. For example, it integrates central gateway, 5G, C-V2X, high-precision positioning, vehicle FOTA, etc.

As of May 2021, China had issued network access licenses for 368 T-Box products, of which 9 models from Lear, Datang Gohigh, Neusoft, DIAS, YF Tech, and China Mobile IoT support 5G networks. At the Shanghai Auto Show, VanJee Technology, Joynext, and Huawei also exhibited 5G C-V2X T-Box.

T-Box Products That Have Been Granted Network Access Licenses and Support 5G Networks

T-Box vendors	Valid until	Device model
Lear	September 2021	CB20CHN08
Datang Gohigh	June 2021	VU3005
	September 2021	VU4105
	September 2021	VU4005
Neusoft Group	July 2021	CCM2008TB
DIAS	June 2021	DIAS automotive wireless terminal i-BOX
Joynext	September 2021	VBOX 5G
YF Tech	September 2021	VE70053300
China Mobile IoT	September 2021	CR05

5G C-V2X T-Box at Shanghai Auto Show, 2021

Domestic and foreign OEMs are actively launching 5G models. The 5G models on the market include BAIC ARCFOX αT, BMW iX, Buick GL8 Avenir, etc. The upcoming models embrace SAIC Roewe MARVEL R, Great Wall Haval H6, Great Wall WEY Mocha and so on.

Models with 5G/C-V2X/High-precision Positioning in China, 2020-2021

Release time	Models	5G technology	V2X	High-precision positioning	Current status	Note
October 2020	BAIC ARCFOX αT	√ Huawei	/	/	Launched	/
November 2020	BMW iX	√ Designed by Harman, manufactured/packaged by BYD	/	/	Launched	The world's first mass-produced car using 5G modules
December 2020	Buick GL8 Avenir	/	√ Qualcomm 9150 LTE-V2X chipset	/	Launched	The first mass-produced model equipped with V2X technology
December 2020	Hongqi EHS9	/	√ Neusoft C-V2X smart antenna	/	Launched	/
February 2021	SAIC Roewe MARVEL R	√ Huawei	√ Huawei	/	Unlaunched	/
March 2021	HiPhi X	√ Snapdragon automotive 5G platform	√ Snapdragon automotive 5G platform	√ Snapdragon automotive 5G platform	Launched	/
April 2021	GAC Aion V	√ Automotive terminals of Jingwei Hirain Technologies; Huawei's modules	√	√ RTK of Qianxun SI, centimeter accuracy	Launched	The world's first 5G +V2X mass-produced smart car with Beidou high-precision positioning
April 2021	Great Wall Haval H6	√ Neusoft's automotive terminals, Qualcomm Snapdragon's modules	/	/	Unlaunched	/
April 2021	Great Wall WEY Mocha	√ Snapdragon automotive 5G platform	√ Snapdragon automotive 5G platform	√ Snapdragon automotive 5G platform	Unlaunched	/
April 2021	WM W6 X Special Edition	√ Qualcomm Snapdragon	/	/	Launched	/

This report analyzes main T-Box vendors at home and abroad:

T-Box vendors included in *Global and China Passenger Car T-Box Market Report, 2021*

Global vendors	Chinese vendors			
LG Electronics	LANYOU Technology	Shanghai Changxing Software	Yaxon Network	Sofar
Denso	Flaircomm Microelectronics	ECARX	Gosuncn	Sinocastel
Continental	THREAD	PATEO	Sirun	IN+
Valeo	Jingwei Hirain Technologies	hh-tech.net	iGentAI	VanJee Technology
Harman	Huawei	Intest	Yuwei	Joynext
Visteon	Neusoft	Soling	DiNA Technology	
Bosch	Desay SV	BDStar Navigation	kpocom	
Ficosa	UCIT	Hopechart	Shenzhen Full-join Technology	

Table of Content

1. Definition and Technology Trends of T-Box

1.1 Definition of T-Box

1.1.1 Definition, Structure and Functions

1.1.2 Working Principle

1.2 Technology Trends of T-Box

1.2.1 Structure Diagram of the National Telematics Industry Standard System Construction

1.2.2 Future Trends of T-Box (1)

1.2.3 Important Policies and Plans for China's 5G, C-V2X and High-precision Positioning

1.2.4 More New Models with 5G, C-V2X and High-precision Positioning

1.2.5 Future Trends of T-Box (2)

1.2.6 Future Trends of T-Box (3)

1.2.7 Future Trends of T-Box (4)

2. Global and Chinese T-Box Market

2.1 Global T-Box Market

2.1.1 Global T-Box Installations in Passenger Cars, 2020-2025E

2.1.2 Global T-Box vendors

2.1.3 Main Joint Ventures Supported by Foreign T-Box Vendors

2.2 Chinese T-Box Market

2.2.1 Overview of Chinese T-Box Vendors and Products

2.2.2 T-Box Products with Network Access Licenses, 2019-2020

2.2.3 T-Box Installations in Passenger Cars in China, 2019-2025E

2.2.4 China's T-Box Installations by Vendors (TOP15) , 2020

2.2.5 China's T-Box Installations by Fuel Type, 2020

2.2.6 China's T-Box Installations by Nationality of OEMs, 2020

2.2.7 China's T-Box Installations by OEM Brands (TOP15), 2020

2.2.8 China's T-Box Installations by Models (TOP15), 2020

2.2.9 China's T-Box Installations by Vehicle Prices, 2020

2.2.10 Overview of Main T-Box Vendors in China

2.2.11 Key Product Information of Main T-Box Vendors in China

3. Remote Control Configuration of New Models Launched by Mainstream OEMs in China

3.1 Remote Control Comparison of Main OEMs

3.1.1 Remote Control Comparison of independent Enterprises (Representative Models Launched in 2020-2021)

3.1.2 Remote Control Comparison of Emerging Enterprises (Representative Models Launched in 2020-2021)

3.1.3 Remote Control Comparison of Joint Ventures (Representative Models Launched in 2020-2021)

3.2 BAIC: ARCFOX

3.2 BAIC: BEIJING

3.3 GAC: Aion

3.3 GAC: Trumpchi

3.4 Geely

3.5 Great Wall: WEY

3.5 Great Wall: HAVAL

3.6 Changan Automobile

3.7 BYD

3.7 BYD: New Version of BYD Auto APP (Released in April 2021)

3.8 SAIC: Roewe/R

3.9 Xpeng

3.10 NIO

3.11 WM
